KOMAL NANKANI

SENIOR FRONTEND DEVELOPER

React.js | Angular | JavaScript/TypeScript | UI Architecture | Java | AWS

komalnankani007@gmail.com · +91-7551848301 · linkedin.com/in/komal-nankani-177891162 · Bengaluru, India

PROFESSIONAL SUMMARY

AI-driven Senior Frontend Developer with 6+ years of experience architecting scalable, high-performance, and accessible web applications using React.js and Angular. Deep expertise in component architecture, state management, performance optimization, and modern UI engineering, with working knowledge of backend integration (Java/Spring Boot) and cloud deployment on AWS. Skilled at translating complex UX requirements into pixel-perfect, production-grade interfaces, leading teams, and embedding AI-powered tools into the development workflow.

PROFESSIONAL EXPERIENCE

Sr. Software Engineer — Frontend | *Schneider Electric, Bangalore* Sep 2023 – Present

- Architecture & Performance: Architected and delivered high-performance, component-driven web pages using React JS, Stencil JS & Java, applying code splitting, lazy loading, and bundle optimization to cut bundle sizes by 30%+ and significantly improve page load times for global users.
- AI-Enhanced UI & SEO: Implemented AEO/SEO strategy with structured schema markup and metadata, improving discoverability of UI content for AI-based chat tools and boosting organic search ranking.
- Technical Leadership: Led a cross-functional team of 6 developers, translating complex stakeholder requirements into reusable, scalable React UI components while enforcing code quality through PR reviews and linting pipelines.
- Cloud Deployment: Worked with AWS and Docker/Jenkins-based CI/CD pipelines to deploy frontend builds reliably, ensuring consistent UI behaviour across staging and production environments.

Sr. Software Engineer — Frontend | *Cardinal Health International, Bengaluru* Jul 2022 – Sep 2023

- Application Development : Architected and maintained large-scale React-based web applications, building reusable component libraries and ensuring seamless data flow from RESTful APIs to the UI.
- Quality Engineering: Drove unit test coverage from baseline to 85%+ by implementing comprehensive Jest/React Testing Library suites, enforcing UI quality standards within an Agile/SCRUM workflow.
- UI Reliability: Diagnosed and resolved critical production UI bugs in fast-paced Agile sprints, improving frontend stability, responsiveness, and overall customer satisfaction scores.

Software Engineer | *Cardinal Health International, Bangalore* Sep 2020 – Jun 2022

- Built responsive, accessible web applications using React and Angular & Java adhering to WCAG 2.1 guidelines and improving cross-device UX for end users, optimized frontend performance through lazy loading, memoization, and asset compression.
- Collaborated with backend teams consuming RESTful APIs (Java/Spring Boot) to ensure reliable data exchange between frontend clients and microservices.

Full Stack Intern | *Mscripts System India, India* Jan 2020 – Aug 2020

- Built a Job Scheduler dashboard using React.js and Material UI, enabling real-time monitoring of organizational tasks and full CRUD workflows for internal teams.

TECHNICAL SKILLS

Frontend: React js, Angular, Svelte js, Stencil js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Component Architecture, State Management, Responsive & Accessible (WCAG 2.1) UI

Performance & Testing: Core Web Vitals Optimization, Jest, React Testing Library, Unit & Integration Testing

AI & Tools: AI Integration, GitHub Copilot, Builder.io, Claude , OpenAI, Google Gemini

Cloud & DevOps: AWS, Docker, Jenkins, CI/CD Pipelines, Git / GitHub, Kafka as messaging engines

Backend (Working Knowledge): Java, Spring Boot, RESTful API Integration

EDUCATION & CERTIFICATIONS

B.Tech — Computer Science & Engineering

CMR Institute of Technology, Bangalore | 2020 | GPA: 8.01

Certifications: React.js • Artificial Intelligence • AWS • RAG & Agentic AI • Agentic AI with Langraph & Langchain
